

Log de Cambios Versión 3.2.2.24.24

- Se contempla la migración desde la versión **3.2.2.24.1f**
- Realizar la actualización de personalizaciones, cualquier cambio en los SQL debe implmentarse en los archivos correspondientes de la nueva versión.

Después de actualizar los archivos de Software y los sitios, realizar las siguientes actualizaciones de base de datos con el SetupBox¹⁾.

1. *En SetupBox > Módulos > Común*

Para la versión 3.2.2.24.24 desde la versión 3.2.2.24.1f no existen actualizaciones, sin embargo, se recomienda verificar si existe alguna pendiente de migraciones anteriores. Dar clic en **Check Upgrade**

- Para actualizar la versión en base de datos:
Dar clic en **Apply Upgrade**.

- Habilitar la casilla **Full Update** para incluir los pasos de verificación de archivos .cfg y tablas/campos
- En caso de no activar la casilla **Full Update** se van a realizar unicamente las actualizaciones de versión pendientes

Resumen de verificación y actualización de los service pack

```
----- Build BDD Basic-----  
Generate:Common  
Generate:SetupBox  
Generate:DataLink  
Generate:CMDB  
Generate:Atis  
Generate:DRobot  
Generate:Demo
```

```

----- Verify BDD Basic-----
Create BDD:Common
Create BDD:SetupBox
Create BDD:DataLink
Create BDD:CMDB
Create BDD:Atis
Create BDD:DRobot
Create BDD:Demo
